

Continuous delivery setup and cloud-based solution implementation for a Regtech software provider

Quick Facts

- Cloud-based SAAS solution MVP designed and implemented within <3 months
- 8 new business compliance reports and dashboards were added per the client's request
- Up to 50% of costs saved compared to the in-house software development
- Billing platform and 5 Data Providers integration

Description

Helping a European company operating in the Regtech sector to switch from ineffective on-premise software to a well-thought-out cloud-powered solution and develop a sustainable digital strategy for 1.5+ years.

Client Info

Our client is a European financial compliance management solutions provider. They entered the market in 2017 and, since that time, managed to pave their way from an ambitious startup to a well-established business with representative offices in multiple countries around the globe (Americas, EMEA, and APAC).

Challenges

- A very tight deadline (MVP should have been delivered within 3 months)
- Lack of qualified and well-rounded software development team for the new Product launch
- Necessity to ensure smooth integration of said team with the already existing business and tech departments
- Disorganized, scattered, and poorly-written documentation and project requirements
- Client's previous negative experience with outsourcing vendors

Timeframe:

Ongoing

Team:

Solution Architect,
Product Owner/Business Analyst,
Front-end Developer,
2 Full-stack Developers

Type: SAAS

Platform: Web

Industry: Fintech, Regtech

Services: Dedicated Team Formation, Web Development (front-end development & back-end development), Cloud Solutions Development

Tech Stack: HTML/CSS, React, TypeScript, Java 11, Spring Framework, REST, Apache Kafka, MongoDB, Azure

Solution

- Assembled a full-cycle software development team (including multiple developers, a business analyst, and a solution architect) within 2 weeks
- Secured quick, trouble-free communication and interaction between our tech team and our client's existing business units (product, operations, management, etc.)
- Completed and organized all the necessary technical documentation/requirements
- Arranged a streamlined all of the software development processes
- Successfully set up multiple development and testing environments to secure the quality of the final product
- Established a continuous delivery pipeline in accordance with best practices
- Developed a functional cloud-based MVP within a discussed timeframe (<3 months)
- Created a project development roadmap for the next 1.5+ years, which is based on our client's business strategy and vision
- Continue to implement new features and enrich the software's functionality in accordance with an agreed roadmap

Business Impact

Despite the fact that Profitsoft continues working on the project, our client has already benefited from the cooperation with our company. Thanks to quick and high-quality MVP delivery, our client has managed to expand their customer base and augment the service range.

Since the new digital product was well received by the audience, it allowed our client to focus on its further enhancement and long-time strategy development, which will benefit the company's growth in the long run.
